Software Engineering student in Tishreen University in the Last year. During my university studies, I learned the basics of various programming languages such as Python and Java, and I became acquainted with many programming concepts such as algorithms, data structures, and the Unified Modeling Language (UML). I also worked on many projects related to these concepts. I have prior knowledge in frontend : HTML, CSS, and JavaScript, and have designed multiple simple projects using these technologies. I have a good understanding of the Laravel framework and have created several projects using it.

EDUCATION

Software Engineering
Tishreen University, Lattakia

Sep 2019 - 2024

EXPERIENCE

Back End Trainee
Focal X Agency, Online

Feb 2024 - Jun 2024

previous trainee at Focal X Agency in the backend , where I created several projects , some of them using php and the other in laravel .
